

Just Elderberry Baby 2 oz.

Our Just Elderberry Baby is an all-natural, lighter concentration elderberry juice supplement made with elderberry concentrate and vegetable glycerin.

Packaged in a convenient 2 oz. dropper bottle for easy dosing. Just Elderberry Baby can be taken straight and placed under the tongue, or you can mix it in your child's favorite drink - juice, water, or even milk. It's a safe and convenient way to give your children (and babies) a little bit of elderberry juice, without corn syrup, artificial colors, sweeteners, or preservatives. This product is suitable for children ages 6 months to 6 years.

Ingredients: Elderberry juice concentrate (*Sambucus Nigra*), clear mountain well water, vegetable glycerin.

About Our Ingredients

Elderberry has been found to have antibacterial, antiviral, and anti-inflammatory properties in research studies. *The Journal of The American Botanical Council* cites a clinical trial supporting the use of a standardized elderberry syrup extract for the treatment of symptoms associated with influenza. The data suggests a 50% reduction in both the severity and duration of symptoms.

The American Botanical Council (ABC) *Clinical Guide to Elderberry* suggests using a standardized liquid extract for 3-5 days, starting at the first sign of flu symptoms. * (1)

Elderberry is rich in nutrients, such as carbohydrates, proteins, fats, fatty acids, organic acids, minerals, vitamins, and essential oils. Polyphenols, known for their antioxidant activity, are the most important group of bioactive compounds present in elderberry in relatively high concentration. The high antioxidant activity of elderberry fruit is associated with its therapeutic properties.

Elderberry has been used in folk medicine as a diaphoretic, antipyretic, and diuretic agent. In recent years it was also found to have antibacterial, antiviral, antidepressant and anti-tumor and hypoglycemic properties, and to reduce body fat and lipid concentration. * (2)
